

# Are We Nearly There Yet Mummy

By Bill. Crawford

**Bang on time under the leadership of Tony Crow our Rear Commodore House, Paphos International Sailing Club moved from Geroskipou to Coral Bay. Moving house or moving Club, the same challenges stand in the way. However, under Tony's navigation, the hurdles of licenses, planning permission, contracts and the plethora of other necessary legal requirements were skilfully ticked off. His team confirmed the quotation "many hands make light work" and the thirty or so willing volunteers soon had the premises "Shipshape and Bristol Fashion". No prizes for spotting our new signage. Thanks, Brian Parker, you have put the cherry on our cake.**

Fridays are "Club Days". Inevitably our first Friday at Coral Bay promised much excitement and yes, also a little trepidation. Would our members like their new premises? Was the move worth while? Huge sighs of relief said it all. One couple confessed that hitherto they had not really recognised the clubhouse as a valued asset of their membership, now they really feel at home and want to stay as long as possible. QED!

Our new Clubhouse together with the exciting developments in sailing activities at Agios Georgios under the helm of our Rear Commodore Sailing, Tony Davenport and his talented team, represent huge step changes in the future of our great club. You must go to [www.pisc.com.cy](http://www.pisc.com.cy) to find out more.

Have you any more stories about the oft asked question "Are we nearly there yet"? We as parents only found out 20 years later that our daughter could not see out of the window whilst sitting in the new child safety seat that Dad fitted in our Camper Van!

*Great New Club Signage, Thanks Brian.
